Preamble

The purpose of this protocol is to present guidelines and recommendations to improve the response of the justice dispensation system towards vulnerable witnesses.

This protocol prescribes guidelines while recording depositions of vulnerable witnesses in order to enable them to give their best evidence. Each witness is unique and is to be addressed accordingly. The vulnerability

of a witness may emerge from a various circumstances. Vulnerable witnesses find their interaction with the legal process, especially the criminal justice process intimidating, particularly the Courtroom experience, which impacts the outcome of every trial. To respond effectively to the needs of vulnerable witnesses, the justice system needs to respond proactively with sensitivity in an enabling and age-appropriate manner, so that the judicial process is less traumatic and secondary victimisation can be minimised.

Objectives

1. To enable vulnerable witnesses to depose freely before any Court in a safe and secure environment;
2. To minimize harm or secondary victimization of vulnerable witnesses in anticipation and as a result of participation in the justice system;
3. To ensure that the rights of all the parties in the judicial processes are effectively implemented. In the context of the criminal process the accused's right to a fair trial and due process, the right of the victim to take part effectively in the proceedings, to be treated sensitively and not be subject to secondary victimization, and the protection of the rights of a vulnerable witness (who may not necessarily be a victim), are effectively implemented.

The Court shall issue an order in writing stating the reasons and describing the approved Courtroom arrangement in the judgment.

25. Factors to be considered while considering the application under Guidelines.-
